

Overview – Snowflake Stage Access Error Troubleshooting

Task: Resolve the Snowflake stage not found or not authorized error.

Problem encountered:

While executing the COPY INTO command to load customers_dirty.csv into the CUSTOMERS table, Snowflake returned:

Troubleshooting and resolution steps:

1. Verified the current database, schema and active role using CURRENT_DATABASE(), CURRENT_SCHEMA() and CURRENT_ROLE().
2. Switched to ACCOUNTADMIN to perform administrative operations.
3. Verified the stage using SHOW STAGES.
4. Created the stage if it was missing using CREATE STAGE IF NOT EXISTS.
5. Checked stage accessibility using LIST.
6. Verified and granted the necessary privileges if required.
7. Uploaded the CSV file to the internal stage.
8. Used COPY INTO to load the CSV data into the CUSTOMERS table.
